**Subject:** Microsoft Settlement

Regarding the Microsoft settlement, I don't believe that the current proposal provides adequate reparations to those injured by Microsoft's anti-competitive behavior. Hundred, even thousands, of small companies have ceased to exist over the decades because of Microsoft's business practices.

Similar to the settlement against AT&T, Microsoft should become a government regulated Monopoly, until its market share drops to an acceptable level (40%, for example, assuming one of it's competitors is now also at 40%). This must be true for all Microsoft product lines, before regulation is lifted.

Even after being found guilty of being an illegal monopoly, Microsoft's behavior has not changed. Regulation of their behavior, with the threat of severe criminal penalties for failure to comply, is the only remedy that I can see will curtail them. The market must be able to return to a state of competition.

Imagine the damage to the United States if Microsoft were to fail, as Enron failed. The risks of a monopoly are greater than merely the loss of competition.

Thank you for your time.
